PROFESSIONAL SUMMARY

Software Engineer with nearly 3 years of professional experience as a Flutter Mobile Application Developer and Full-Stack Developer, specializing in cross-platform Android and iOS application development using Flutter, Dart, Java, and Spring Boot. Experienced in designing, developing, testing, deploying, and maintaining enterprise and consumer applications with expertise in mobile architecture, REST and GraphQL API integration, database design, application security, performance optimization, and scalable software solutions. Currently driving mobile app redevelopment at GS1 India across multiple production products used nationally.

TECHNICAL SKILLS

Languages: Dart, Java, SQL, JSON

Mobile & Cross-Platform: Flutter, Android SDK, Provider, BLoC, Hive, Flutter Secure Storage, Offline Data Caching, Deep Linking, Responsive UI, UI/UX Implementation, Cross-Platform Mobile Development

Backend & APIs: Spring Boot, Hibernate, JDBC, RESTful APIs, GraphQL, Dio, HTTP, JSON

Databases & Storage: MySQL, Hive, Stored Procedures, Firebase, Firebase Crashlytics

GS1 & Scanning: Scandit SDK, Google ML Kit, GS1 Digital Link, DataMatrix, QR Code, GTIN, Barcode Scanning, Product Authentication, Product Traceability

Integrations & Security: Google Maps API, Razorpay Payment Gateway, SuiteCRM, Nuxeo CMS / DMS, RBAC, Security Groups

Tools & Platforms: Git, GitHub, Postman, SonarQube, Android Studio, Xcode, VS Code, Figma, Google Stitch, Claude MCP, TestFlight, Google Play Console, App Store Connect

Practices: SDLC, Agile / Scrum, Jira, CI/CD, Release Management, Debugging, Bug Fixing, Regression Testing, Enterprise Application Development

PROFESSIONAL EXPERIENCE

Software Engineer Mobile App Developer

GS1 India

Aug 2025 – Present

Chennai, India

- Contribute to development, feature enhancement, and maintenance of 5 live Flutter applications Smart Consumer, ClickIt, Trace, Offline Trace, and Verified used in production at national scale.
- Drive UI/UX redesign and architectural refactoring of legacy apps, modernizing interfaces and improving performance, navigation, and offline reliability.
- Implement GS1 Digital Link, DataMatrix, QR, and GTIN-based scanning flows using the Scandit SDK and Google ML Kit for product authentication and traceability.
- Migrate native Android (Java) applications such as Verified to Flutter, unifying Android and iOS into a single cross-platform codebase.
- Build and maintain reusable foundation modules shared services, authentication, navigation, and UI components to accelerate future Flutter app development.
- Manage end-to-end releases across the Google Play Console, App Store Connect, and TestFlight, including production monitoring with Firebase Crashlytics.
- Perform debugging, bug fixing, and regression testing to ensure application stability across releases; translate product requirements into reliable, production-ready mobile features.

Software Engineer Full-Stack Developer

Technospace i Solutions

Sep 2023 – Jul 2025

Chennai, India

- Designed and built a Flutter-based loan collection application from scratch enabling field agents to track payments, capture digital signatures, and operate fully offline using Hive local storage with backend synchronization.
- Engineered a custom enterprise CRM platform with multi-role RBAC, security group management, and Google Maps integration for real-time agent tracking and geo-tagged customer visits.
- Developed and maintained Spring Boot backend services powering mobile and web clients via RESTful and GraphQL APIs, improving data fetch efficiency and reducing response times.

- Designed relational schemas in MySQL for loan records, user profiles, and payment histories; optimized query performance using stored procedures and indexing.
- Integrated Nuxeo DMS for secure document upload, storage, and retrieval, enabling paperless workflows for field agents; built admin dashboards for role and permission management across user groups.
- Integrated Razorpay Payment Gateway for secure online payments, EMI collections, and transaction management.
- Integrated SuiteCRM for customer relationship management, lead management, case allocation, and workflow automation.
- Enforced code quality standards with SonarQube and validated API contracts with Postman across all services; collaborated via Git, GitHub, and Jira using Agile / Scrum practices.

KEY PROJECTS

Smart Consumer GS1 Consumer Product App GS1 India, 2025 – Present

Flutter, Dart, GS1 Digital Link, DataMatrix, Scandit SDK, Google ML Kit, Firebase

- Revamped the consumer-facing app with redesigned UI/UX, refactored architecture, and GS1 Digital Link + DataMatrix scanning for product authentication.

GS1 Verified Java to Flutter Migration GS1 India, 2025 – Present

Flutter, Dart, Android SDK, GS1 Standards, Firebase

- Redeveloped the GS1 Verified app by migrating it from native Android (Java) to Flutter, unifying it into a single cross-platform codebase for Android and iOS.

Loan Collection App Offline Field Operations Technospace, 2023 – 2025

Flutter, Hive, Spring Boot, MySQL, GraphQL, Razorpay

- Offline-first field application for loan agents with payment tracking, digital signature capture, EMI collection via Razorpay, and seamless backend synchronization on reconnect.

Custom CRM Platform RBAC & Agent Tracking Technospace, 2023 – 2025

Flutter, Spring Boot, MySQL, Google Maps API, Nuxeo DMS, SuiteCRM

- Multi-role enterprise CRM with live agent tracking, geo-tagged customer visits, document management via Nuxeo, and granular RBAC security across user groups.

SE Learning Platform Offline-First AI Learning Roadmap Personal Project, 2026

Flutter, Dart, Hive, Offline-First Architecture, AI Integration

- Designed and developed a structured 16-level software-engineering learning roadmap as a Flutter application, built fully offline-first so the core learning experience never depends on network connectivity.
- Integrated AI to enhance learning content and guidance without making AI a hard dependency graceful degradation when offline or when AI services are unavailable.

EDUCATION

B.E., Chemical Engineering CGPA: 8.40

Agni College of Technology

2017 – 2021

Chennai, India

Rani Lady Meyyammai Higher Secondary School HSC: 80% (2016–2017) | SSLC: 96.5% (2014–2015)
